

# FIXZ PRO

## PRODUCT SHEET

Suitable for pitched roofs, flat roofs, and barrel roofs

Ideal for metal roofs:  
trapezoidal, corrugated, Kliplok

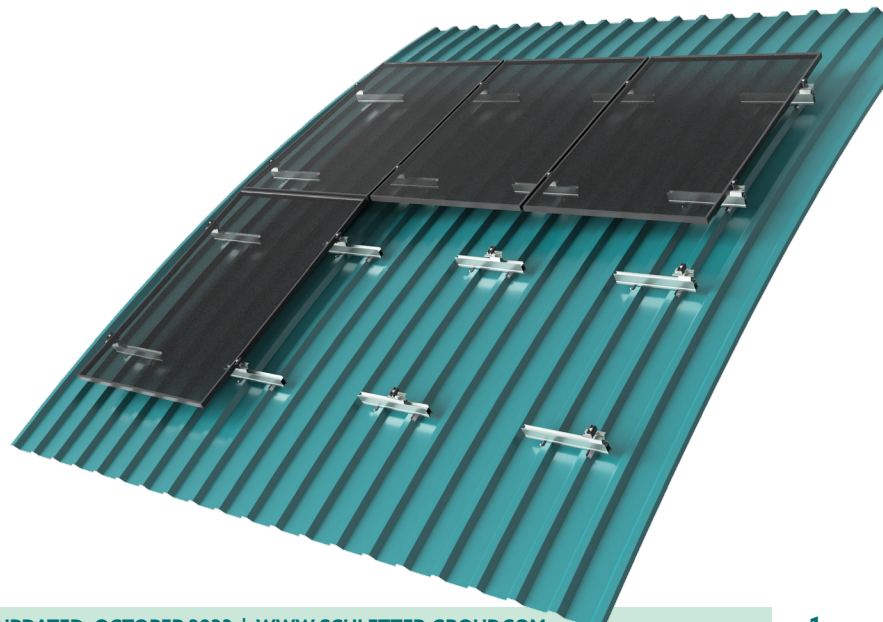

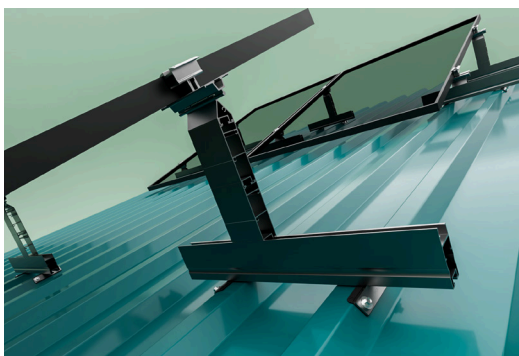

Slight increase at the upper module  
support in 90 mm increments

### THE AFFORDABLE ADDITIONAL GIRDER

For metal roofs with a slope of less than 10°, installing modules parallel to the roof may not be ideal for maximum yield and optimal self-cleaning. Conventional support by struts is also often impossible or uneconomical because of the higher loads.

In such cases, flat elevation angles – such as can be achieved with FixZ Pro – offer a universal, extremely flexible and cost-effective solution with ideal load transfer into the roof covering.

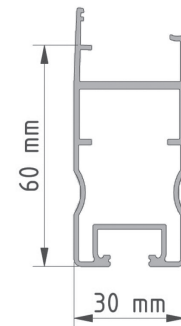

## FIXZ PRO

### TECHNICAL DETAILS

<b>Field of application</b>	Sheet metal roofs (trapezoidal, corrugated, Kliplok)
<b>Material</b>	Profile: Aluminum
<b>Planning aid</b>	Configuration and static dimensioning via the Schletter Configurator
<b>Statics</b>	Spanning tables available to suit AUST/NZ standard
<b>Connection</b>	<ul style="list-style-type: none"> <li>• Top: FixGrid Pro single-click connection</li> <li>• Bottom: M10 screw channel</li> </ul>
<b>Warranty</b>	25 years in accordance with our warranty terms
<b>Supplementary documents</b>	Assembly instructions for FixZ Pro Component overview - Profile

### ITEM OVERVIEW

<b>120034-04400</b>	4400 mm
<b>120034-93600</b>	3600 mm – black anodized

### SUPPLEMENTARY ITEMS (to be ordered separately)

<b>129200-000</b>	Pro internal connector
<b>165005-003</b>	Pro heightening element
<b>165005-004</b>	Pro module support
<b>165005-013</b>	Pro heightening element – black anodized
<b>165005-014</b>	Pro module support – black anodized
